

# Table of Contents

## Lecture Summary Contents

1. Introduction and History
2. Inflammation and Healing
3. Abnormal Immune Response
4. Infection
5. Neoplasms
6. Genetics & Pediatrics Disorders
7. Cardiovascular & Lymphatic Disorders
8. Respiratory Disorders
9. Musculoskeletal Disorders
10. Neurological and Musculoskeletal Disorders
11. Acid, Fluid Electrolyte Disorders
12. Gastrointestinal Disorders
13. Endocrine Disorders
14. Neuropsychiatric Disorders

### Unit III

- Respiratory Function and Alterations in Gas Exchange
- Obstructive Pulmonary Disorders
- Restrictive Pulmonary Disorders
- Fluid and Electrolyte Homeostasis and Imbalances
- Renal Function
- Intrarenal Disorders
- Renal Failure
- Disorders of the Bladder
- Male Genital and Reproductive Function

### Unit IV

- Female Genital and Reproductive Function
- Alteration in Female Genital and Reproductive Functions
- Sexually Transmitted Diseases
- Gastrointestinal Function
- Gastrointestinal Disorders
- Alterations in Function of the Gallbladder and Exocrine Pancreas
- Liver Diseases
- Mechanisms of Endocrine Control
- Alterations in Endocrine Control

## Exam Practice Contents

### Unit I

- Core Pathophysiology Concepts
- Stress, Adaptation, and Coping
- Cell Structure and Function
- Cell Injury, Aging, and Death
- Molecular Genetics and Tissue Differentiation
- Genetic and Developmental Disorders
- Neoplasia
- Infectious Processes
- Inflammation and Immunity
- Alterations in Immune Function

### Unit II

- Malignant Disorders of White Blood Cells
- HIV Disease and AIDS
- Alterations in Oxygen Transport
- Alterations in Hemostasis and Blood Coagulation
- Alterations in Blood Flow
- Alterations in Blood Pressure
- Cardiac Function
- Alterations in Cardiac Function
- Heart Failure and Dysrhythmias: Common Sequelae of Cardiac Diseases
- Shock

### Unit V

- Diabetes Mellitus
- Alterations in Metabolism and Nutrition
- Neural Development and Cortical Function
- Acute Disorders of Brain Function
- Chronic Disorders of Neurologic Function
- Alterations in Special Sensory Function
- Pain
- Neurobiology of Psychotic Illnesses
- Neurobiology of Nonpsychotic Illnesses
- Structure and Function of the Musculoskeletal System
- Alterations in Musculoskeletal Function: Trauma, Infection, and Disease
- Rheumatoid Disorders
- Alterations in the Integumentary System
- Burn Injuries
